FULL-STACK SOFTWARE ENGINEER (Available Full-Time: August 2026)

Software Engineer with hands-on experience building scalable backend systems, REST/GraphQL APIs, and data-driven applications. Skilled in performance optimization (up to 75% faster queries), CI/CD automation, and designing clean, maintainable architecture. Interested in backend engineering, large-scale systems, and ML-driven platforms.

EDUCATION

Bachelor of Software Engineering

Graduation: May 2026

Concordia University, Montreal, QC

Relevant Coursework: Data Structures & Algorithms, Database Systems, Operating Systems, Cloud Computing, Agile Development, Distributed Systems

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, Java, SQL, Dart, HTML/CSS
- **Frameworks:** React, Next.js, Node.js, Express.js, Django REST, FastAPI, Flutter, GraphQL
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase, Supabase
- **Tools & Cloud:** AWS, Docker, Git, GitHub Actions, CI/CD, WebSockets, Vite, Tailwind
- **Practices:** Agile/Scrum, TDD, REST API Design, Code Review, Clean Architecture, Pre-Commit Hooks

PROJECTS

Healthcare Management System — Django, React, TypeScript, MySQL

June 2025 - Present

- Built a full-stack healthcare platform managing 447 patient records and 303 staff accounts.
- Implemented JWT authentication with role-based access control for admin, doctor, and staff workflows.
- Optimized database queries by 75% (from 3s to 0.7s) via indexing, caching, and improved schema design.
- Designed a robust REST API with 15+ endpoints powering interactive data analytics dashboards.
- Enforced automated code quality checks across the team using 13 custom pre-commit hooks.

VeloSim – Bike Network Simulator — Python, React, PostgreSQL, Websocket

Sep 2025 - Apr 2026

- Contributing to an 11-person team building an open-source simulation platform with BIXI Montreal.
- Implementing WebSocket connections to handle live simulation updates and real-time data streaming.
- Developed frontend control features, including an "All Routes Toggle" to streamline map state management.
- Writing comprehensive unit tests and conducting peer code reviews during weekly Agile sprints.
- Collaborating on core system architecture decisions, schema migrations, and data visualizations.

Real-Time Auction Platform — React, Firebase, JavaScript

May 2025 - Present

- Built a real-time bidding web application deployed for the Hand in Hand Myanmar charity event.
- Implemented live Firestore synchronization to handle instant, concurrent bid updates across users.
- Designed a comprehensive admin dashboard featuring full CRUD operations and a multi-image upload gallery.
- Added a lightweight guest authentication flow utilizing localStorage to optimize user onboarding and UX.

Campus Navigation App — Flutter, Google Maps API

Jan 2025 - April 2025

- Developed a cross-platform mobile application achieving 95% location tracking accuracy.
- Integrated Google Maps API and optimized pathfinding paths, reducing user travel time by 30%.
- Implemented real-time geolocation tracking, localized building data, and interactive UI components.
- Established a robust CI/CD pipeline using GitHub Actions to automate linting and build testing.

LANGUAGES – **Thai:** Native, **English:** Fluent, **French:** Intermediate
