FULL-STACK SOFTWARE ENGINEER

Software engineer who ships across the full stack, from real-time Firebase apps to Django REST backends to Next.js platforms. Track record of stepping into unfamiliar codebases and delivering under tight deadlines. Bangkok-based, open to remote. Interested in backend engineering, large-scale systems, and ML-driven platforms.

EDUCATION

Bachelor of Software Engineering

Graduation: May 2026

Concordia University, Montreal, QC

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL, Dart, HTML/CSS

Frameworks: React, Next.js, Node.js, Express.js, Django REST, FastAPI, Flutter, GraphQL

Databases: PostgreSQL, MySQL, MongoDB, Firebase, Supabase

Tools & Cloud: AWS, Docker, Git, GitHub Actions, CI/CD, WebSockets, Vite, Tailwind

Automation & No-Code: Zapier, Make.com, n8n, Softr, Monday.com, LINE API, Google Sheets API

LLM Tooling: Claude Skills/Projects, agent and subagent workflows, prompt design

Practices: Agile/Scrum, REST API Design, Code Review, Clean Architecture, Pre-Commit Hooks

EXPERIENCE

Teeraporn Hospital — Digital Transformation Consultant (Independent)

Aug 2026 – Present

- Advising an aesthetic hospital on digital transformation initiatives, engaged independently as an external partner.

San Fun Group

May 2025 – Present

IT & Systems

Aug 2026 – Present

- Provide ongoing IT support and troubleshooting for the organization's systems and tools.

Business Development & Consultant

Jun 2026 – Jul 2026

- Designed and deployed automation workflows (Zapier, Make.com) integrating LINE, Monday.com, Google Sheets, and email, cutting manual process time by roughly 5x.
- Built internal AI-assisted tooling using Claude Skills and Projects to automate recurring operational workflows, reducing time spent on them by roughly 10x.

Business Development & Consultant Intern

May 2025 – May 2026

- Joined a non-developer team within a week to a live charity event, finished their HTML + Firebase bidding app, and shipped it on time; later took full ownership and rebuilt it as the organization's long-term platform.
- Developed Vanasin Residence's public website using AI-assisted no-code development (Softr) with Monday.com as the backend database.

PROJECT

Healthcare Management System — PHP → Django, React, TypeScript, MySQL

June 2025 - Present

- Sole PHP developer in the team phase; co-designed the MySQL schema, triggers, and indexing strategy, cutting the slowest patient-lookup query from 3s to 0.7s via indexing, caching, and schema redesign.
- Rewrote the full stack solo to Django REST + React/TypeScript with JWT auth and role-based access control workflows.
- Designed 15+ REST endpoints powering interactive analytics dashboards; modelled a full hospital domain, seeded and exercised against 447 patient records, 303 staff accounts, and 11 facilities.
- Enforced code quality with 13 custom pre-commit hooks (flake8, ESLint, Prettier, Black).

VeloSim – Bike Network Simulator — Python, FastAPI, React, PostgreSQL, WebSocket

Sep 2025 - Apr 2026

- Frontend engineer on an 11-person team building a bike-network simulation platform with BIXI Montréal.
- Implemented the WebSocket frontend integration driving live simulation updates and real-time data streaming; wrote Vitest unit tests and ran peer code reviews on a weekly Agile cadence.
- Built frontend map controls including an "All Routes Toggle" to simplify map state management, and collaborated on system architecture, schema migrations, and data visualizations.

Real-Time Auction Platform — React, Vite, Firebase, Next.js, TypeScript, Supabase

May 2025 - May 2026

- Rewrote a non-developer team's HTML + Firebase app to React + Vite + Firestore with real-time bidding and full admin CRUD.
- Implemented Firestore snapshot listeners for instant bid sync across all attendees, plus a multi-image upload gallery and lightweight guest auth with no signup friction.
- Migrated to Next.js + TypeScript + Supabase (App Router, Vercel) for a stable long-term platform. Live: hand-in-hand-auction.vercel.app

Campus Navigation App — Flutter, Dart, Google Maps API

Jan 2025 - April 2025

- Built indoor and outdoor navigation for a cross-platform Flutter app on a nine-person Agile team, covering room-to-room routing across two campuses.
- Integrated the Google Maps API with custom indoor floorplan data and accessibility-aware route planning.
- Established the CI pipeline with GitHub Actions, Codecov coverage tracking, and SonarCloud quality gates; shipped v1.0.0 in April 2025.
